

Low-Level Laser Stops Pain at Cellular Level

Bethlehem naturopathic Doctor Michael Jude Loquasto has been successfully treating patients using the Erchonia Low-Level Laser (3LT) for chronic pain, and states, "The laser 'reactivates' the cells and gets them to perform their intended function almost instantaneously. The Low-level Laser is one the greatest breakthroughs in drug-free treatment I have seen in my 50 years of practice."

The Erchonia Low-Level Laser was the first to receive U.S. Food and Drug Administration clearance as a noninvasive, safe way to manage chronic pain without negative side effects. In a double-blind clinical trial, the Erchonia laser was proven to reduce pain by 66 percent. Its actions are photochemical, not thermal. Hot lasers in the medical world are used for surgical precision, while cold lasers are used for healing precision.

Dr. Loquasto offers a free Natural Health Open Forum at 6 p.m. on the third Tuesday of every month at 2571 Baglyos Circle in Bethlehem. For a consultation or to register for the forum please call 484-821-1460. See ad, page 58.5
